OCC HEALTH IT PAIN SCALE

0   1   2   3   4   5

rate your pain

An occupational health IT assessment tool

enterprise**health**

If your current approach to documenting occupational health is causing you and your colleagues pain, perhaps it's time to consider a more robust occ health IT solution.

Use this tool to catalog your current pain levels — and determine whether you are experiencing discomfort, a general sense of malaise, or mind-numbing pain of the sort that makes you glad you have an on-site employee clinic at your disposal.

OCC HEALTH IT PAIN SCALE

0	1	2	3	4	5
Pain free, happy as a clam	Mild discomfort, was that a bad clam?	In pain, present but not productive	In real pain, no longer present	Beating my head on desk, start concussion protocol	Where do we keep the cyanide capsules?

Rate your occ health IT pain from 0 to 5.

☐	**User interface/experience** (number of clicks, ease of use, intuitive)	☐	**Support** (responsive vendor, there when we need them)
☐	**Single platform** (manage employee health on one platform vs. mix of solutions)	☐	**Single sign-on** (users/employees logged on from corporate environment)
☐	**Interoperability** (interfaces w/HR system, labs, medical devices, etc.)	☐	**Accessibility** (data easily accessed, can be aggregated across enterprise)
☐	**Employee portal/self service** (employee self-scheduling, questionnaire completion)	☐	**Reporting** (powerful reporting, ad-hoc reports, graphical reporting tools)
☐	**Confident compliance** (reports and forms managed and completed automatically)	☐	**Reminders/alerts** (automatic/electronic reminders, built-in alerts/warnings)
☐	**Clinic productivity/efficiency** (limited manual effort, employee self-service, automation)	☐	**Data entry** (data entered once, propagates across solution)
☐	**Configurability** (solution can support our workflows/practices)	☐	**Access control** (granular, role-based access)
☐	**Automated data sharing** (clinic, administrators, employees, supervisors)	☐	**Orders/results** (managed electronically, configured order panels)
☐	**Health surveillance** (automated management of surveillance requirements)	☐	**Immunizations** (manages individual and mass immunizations)
☐	**Clinical care** (handles non-occ, primary care, disease management)	☐	**Scheduling** (integrated scheduling, employee self-scheduling)
☐	**Worksite injury & illness** (robust data capture, case management)	☐	**Document management** (manages paper documents, incorporates existing forms)
☐	**Work status** (generates/electronically delivers work status reports)	☐	**External provider management** (manages/tracks referrals, outside reviews, external providers)
☐	**Web-based/cloud solution** (vendor-hosted, software as a service)	☐	**Tasking** (automated tasking, follow up)
☐	**Upgrades** (regular intervals, installed automatically)	☐	**Travel management** (manages international travel)

☐ **TOTAL SCORE OF BOTH COLUMNS**

0-20   *Pain? What pain?* — Good for you, you're one of the lucky ones!

21-40   *Yowser! This is really uncomfortable.* — It's OK. The first step is admitting the pain.

41+   ***Wow, this really hurts! Like stub-my-toe hurts! — It may be time to consider making a switch.***

Enterprise Health can provide you with helpful tools and guidance — and an occ health solution designed to provide welcome relief.
