

It's **game over** for time-consuming tasks with **Ozwell AI**

Meet Ozwell AI, your new productivity partner — simplify workflow management, speed encounter documentation, save time and enhance overall efficiency.

Use Ozwell to **increase productivity** and **assist in clinical decision support**, dramatically **reducing the time** you spend on clerical tasks.

In just seconds, Ozwell can:

- Generate concise summaries of dense medical records
- Speed and simplify pre-visit preparation and post-visit referral letters
- Draft return-to-work letters, including restrictions and accommodations
- Record and transcribe a patient encounter, generate a SOAP note, and extract coded observations, orders, prescriptions and other actions that can auto-populate encounter templates
- Ingest photos of medical device results or medical documents, and extract discrete data elements
- Quickly dictate directly into the Enterprise Health application using speech-to-text capability, with AI-assisted refinement
- Translate on the fly — including translation of medical record content as well as recorded and transcribed conversations

Ozwell includes advanced features, engineered for occ and employee health:

AI quick buttons

Built-in shortcuts for frequent tasks and workflows

Customized workflows

Type or speak to dictate Ozwell's actions

Speech-to-notes

New flex encounter technology inputs dictation directly into SOAP

Dynamic commands

Real-time suggested actions, based on voice inputs

Robust reporting

Powerful reporting capabilities, for patients or populations

Device optimization

Seamless integration across devices — computer to tablet to mobile
